

September 2015

FINANCIAL OVERVIEW & KEY RISK AREAS

DP Income

Year to date actual income is £8.79M which is within 1% of budget year to date. Given that we are so close to forecasted budget year to date, the full year forecast of £18M is deemed appropriate to remain as the full year forecast. Our annual peaks are in October and then to a lesser extent in January; December is traditionally a low month for fee income. These months will be key in determining the reasonableness of the £18M full year forecast.

Cash Underspend

We continue to forecast an underspend against our budgeted income of just less than £700k.

We will continue to monitor our resources by:

- Review of income forecasts each month for accuracy/ prudence
- Fee income strategic work around how we set our fee levels
- Isolate key spend areas or projects that could be accelerated or put on hold for a quick turnaround if our environment changed with little notice
- Balance sheet reporting and cash flow reports are being developed and will be available once the purchase management system has been installed – expected to be in place by late 2015.

Staff Recruitment

Staff costs pose a significant risk to the business if recruitment cannot keep up with budgeted staff levels.

Although we are showing a significant underspend under staff, recruitment in October is sufficient to mitigate any risk of underspend and pull the actuals into line with budget by the end of November. The situation is being monitored and re-forecasted where appropriate monthly, if and where staffing situations or business needs change.

Due to the decision by HM Treasury that specific approval should have been sought for the Deputy Commissioner salary increases, an administrative fine of £18,400 has been imposed and will be recognised within this financial year. Retrospective approval was given and a briefing note included in the 2014/15 annual report.

Capital Spend

Our 'allocated' capital budget has now been informally confirmed as £850k (formal approval to follow at Budget Version 2) which is a very positive outcome following a month of uncertainty. Although this is a real achievement, we have been assured that this is unlikely to be available in

coming years. Planning has begun on how we can mitigate this risk and liaison meetings are ongoing with the MOJ.

Budget Version 2

We are now reporting internally against Budget Version 2 (BV2), reporting to the MOJ continues to be against BV1 until formal approval has been given. This is now unlikely to be given and rather budget discussions moved directly to DCMS.

Movement of sponsorship from the MOJ to DCMS

Financial meetings between the ICO and DCMS will take place over the coming months with full reporting planned to move across in the New Year. New budget discussions for 2016/17 are solely being held with DCMS. This may change how we shape and report our new budget.

Purchase Management System

Purchase Management System work is underway, a soft launch has already started with key users with a very positive reception and it is expected to be delivered to all staff by the end of October. This will represent a key step forward in financial management in the ICO with no unauthorised purchases and an efficient budget approval process.

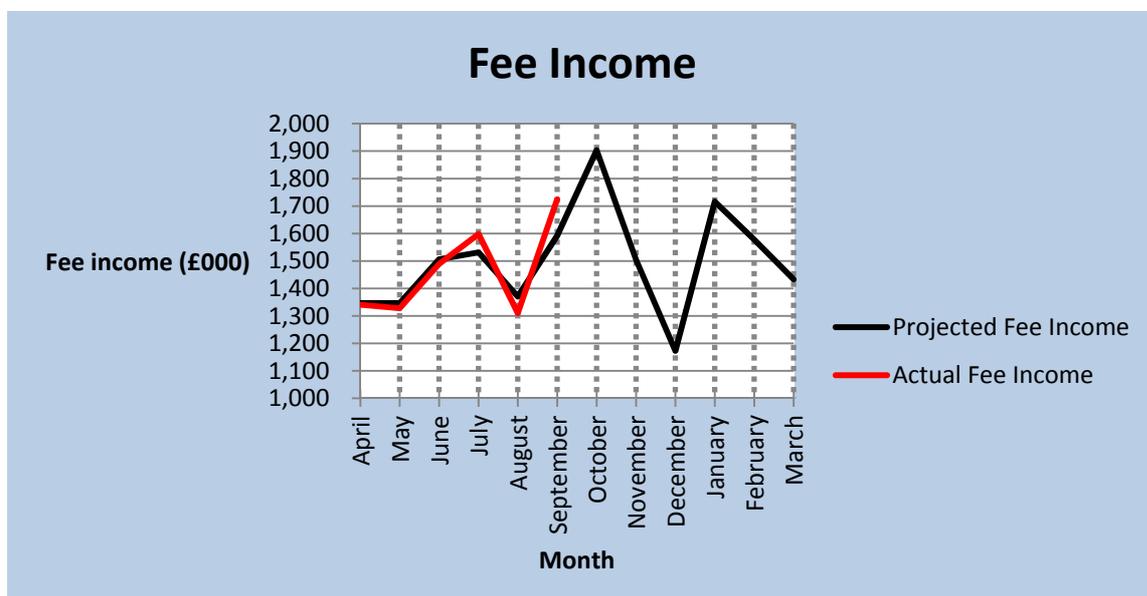

INCOME

Grant-in-aid for freedom of information activities

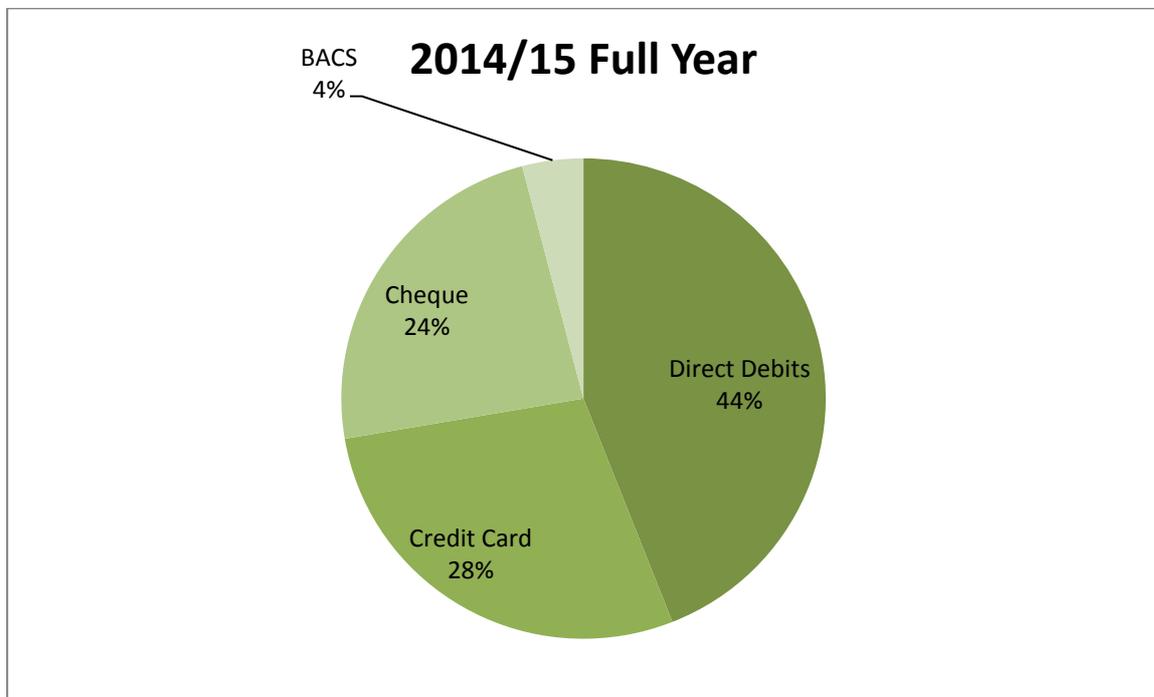

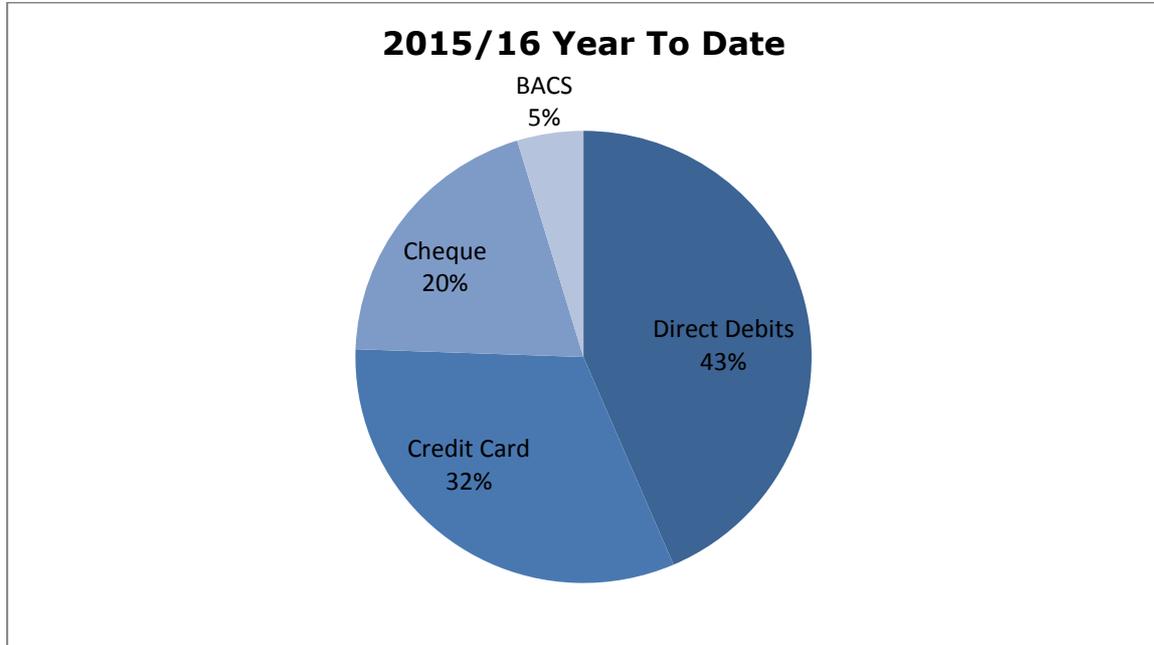

The grant-in-aid available for drawdown over 2015-16 has been confirmed at £3.7M, the first and second tranches of £938k and £921k respectively have been drawn, two further drawdowns are expected in October and January of £921k each.

Data Protection fees processed

The chart below shows the actuals vs our current budget for the year 2015/16.

The year to date fee payment method split is shown below, showing a definite trend towards credit card payments (↑ 4%) and away from cheques (↓ 4%) from the average over 2014/15. Direct Debits are down (↓ 1%) and BACS payments are up (↑ 1%)

EXPENDITURE

Spending controls

The ICO is complying with the Cabinet Office Spending Controls Guidance v 4.0

<https://www.gov.uk/government/publications/cabinet-office-controls/cabinet-office-controls-guidance-version-40>

We are also required to obtain specific MOJ approval for any IT or communications spend over £50k for individual projects. We will only be required to report spend over £50k not included in the original budget. No such spend is known to have occurred to date.

Total office costs

There are quite a few categories within office costs that are over or under budget, as this is the first year we have separated out all of the distinct categories, the budget needs further work to make sure that each category is sufficiently resourced. Overall the budget is within 4% and not considered to be a risk of material over or underspend. This is being monitored closely.

Total staff FTE report and costs

Staff costs have come in £222k (3%) below forecasts for September. Although this is a considerable amount to be underspent at the half year point, there are some mitigating factors that allow us to gain some comfort with staff costs;

As at the date of this report 12 October 2015, staff FTE was at 392.8 (383.8 at 30 September 2015) and there were over 26 staff within clearing, either security clearing or notice period, which means that by November we expect to be slightly over compliment. This will reduce the budget underspend over the next six months.

Since we have not finally agreed the pay increase in July 2015, we have not accrued for the additional costs which we estimate to be £60k which will also reduce the underspend.

Training and Recruitment

Recruitment is over budget by £30k, largely due to the costs of recruitment of a new deputy commissioner (c. £10k) and other large scale recruitment drives to keep staff expenditure on track. There are some minor underspends amongst training, although expectation is that the overall spend will be to budget.

IT Costs – Service Delivery

IT spend overall is to budget (within 6%), there are some fluctuations against budget lines where the spend is determined by usage – software licensing, printing usage and telephony, which is to be expected.

Considering the major business impact of the IT incident in May, the actual realised costs (outside resource downtime) have been kept to a minimum and have been estimated at less than £15k. This additional cost has been included within App & Desktop Support.

IT Projects

There is an underspend within IT projects of £190k (40%). This budget tends to be back end loaded due to the time it takes to mobilise projects after budget approval, however it is expected to spend to budget.

Communications Spend

Due to the almost seasonal nature of the communications spend especially within Campaigns, Print & Conferences we expect to see a deviation to the profiled budget. This will continue to improve as the months move on and we can profile more accurately. After review, no particular risk area has been identified with the communications spend.

Banking, finance & audit costs

Finance costs are as expected.

Staff travel

Overall staff travel is within 10% of budget, however there are significant fluctuations within departments with some underspending and some set to overspend due to various uplifts in the travel required. Budget virements have been agreed within departments and no uplift will be required overall.

Legal, professional & other

Legal & other costs are underspending by £54k, the majority of which is due to a £31k underspend on legal, £10k underspend on privacy seals and £7k on research. Legal and research budgets fluctuate based on caseload, but consistently spend to budget overall. The privacy seals project has only been commissioned late in the year and is also expected to spend to budget.

CAPITAL EXPENDITURE

Across the IT project expenditure, approximately £200k is capital in nature. This will be confirmed during a detailed capital review later in the year.

Civil Monetary Penalties

The current debtor of CMPs owed to the ICO as at 30 September 2015 is £366,110.

<i>B/f 2014-15</i>	<i>142,500</i>
